

Our Goal...

To provide another option to replacement. We specialize in repairing, rather than replacing your old or damaged windows and roof. We offer a free, professional evaluation of your existing windows or roof to see if repair is a good fit for you. Whether your windows are wood, vinyl, or metal, they can be improved and made energy efficient just like a new replacement.

Introducing Roof Maxx, owned and operated by G&G Window Repair

Roof Maxx is your alternative to roof replacement. We use a soy based oil to add flexibility back into your shingles, potentially adding up to 15 years of life to your roof. The oil is 100% natural, so it is environmentally friendly, and safe for kids and pets.
